Note: While there are tons of other plug-ins available (both free and paid). These are the basic plug-ins you need for the basic Stealth Blogging setup.

If you have questions or would like to learn more about how to setup lucrative blogs, please visit:

StealthBlogger.com

1. Initial Plug-Ins:

Max Banner Ads

Easily rotate banners and ads in almost anywhere in your wordpress blog without editing the theme.

<http://supersimpleblogging.com/track/maxbannerads>

Google Analytics for WordPress (or another analysis plug-in like StatPress)

This plugin makes it simple to add Google Analytics with extra search engines and automatic clickout and download tracking to your WordPress blog.

<http://yoast.com/wordpress/google-analytics/>

Google XML Sitemaps

This plugin will generate a sitemaps.org compatible sitemap of your WordPress blog which is supported by Ask.com, Google, MSN Search and YAHOO.

Platinum SEO Pack

Complete SEO solution for your Wordpress blog

<http://techblissonline.com/platinum-seo-pack/>

TinyMCE Advanced

Enables advanced features and plugins in TinyMCE

<http://www.laptoptips.ca/projects/tinymce-advanced/>

Privacy Policy Plug-in by Eric Guigere

Automatically adds a Google compliant “privacy policy page. This is a requirement (as part of Google AdSense’s Terms of Service) if you are planning on adding AdSense to any of your blogs.

You can download it here: <http://www.synclastic.com/plugins/privacy-policy/>

Another alternative:

Easy Privacy Policy Plug-In

Unfortunately the author’s site is down at the moment, but just type in ‘privacy policy’ in the search box at Wordpress.org and choose the one by Kevin Sparrow:

<http://wordpress.org/extend/plugins>

Wordpress Auto Tagger

This will create a ton of tags based on the content of your post (using Yahoo Answers’s API).

<http://wordpresssupplies.com/wordpress-plugins/auto-tagger/>

RSS Footer

A really cool plug-in that allows you to add a sentence in your rss feeds with a link back to your blog. This is really awesome if somebody starts ‘scraping’ your articles from your sites as it will add automatic backlinks to your site (without that person knowing about it).

<http://yoast.com/wordpress/rss-footer/>

2. Traffic Plug-Ins:

3 Way Links Plug-In for Wordpress

This is a simple plug-in that makes the setup of 3 way links a no-brainer (for those of us who are wordpress challenged). This is the reason why I recommend Jonathan Leger's 3waylinks.net if favor of Neurolinker (in other words, it's more newbie friendly).

However, please note that 3waylinks.net does not allow 'spiritual, 'religious', 'gambling' related sites. So if you plan on building sites around poker, yoga, tai ji, Christianity etc. you should go with Neurolinker.

Watch the Video on how to use it here: <http://stealthblogger.com/setting-up-the-traffic-plug-ins/>

Onlywire for Wordpress

Onlywire is a "free" service that allows you to bookmark dozens of social bookmarking sites. However, it is only "free" if you have their buttons installed on EVERY post on your site. So, they've created this plug-in to make this easy for Wordpress users. *(note: install version 1.5 instead of the latest version)*

<http://onlywire.com/thebutton>

Watch this video on how to set it up: <http://stealthblogger.com/setting-up-the-traffic-plug-ins/>

OnlyWire Auto Poster for Wordpress

Once you've setup the "Onlywire for Wordpress" plug-in, you can install this plug-in. This is a free social bookmarking plug-in that automatically bookmarks your posts via the Onlywire service (which is a free social bookmarking service).

<http://www.lionstarr.de/onlywire-autosubmit-a-wordpress-plugin.html>

Watch the Video on how to set it up AND tips on how to use it:

MaxBlogPress Ping Optimizer

Saves your wordpress blog from getting tagged as ping spammer by installing this plugin.

<http://supersimpleblogging.com/track/maxblogpresspingoptimizer>

Download the pinglist here: <http://stealthblogger.com/getitnow/pinglist.txt>
